

Spine Neurosurgeon

The University of British Columbia
Vancouver Hospital Combined Neurosurgical and
Orthopaedic Spine Program

The Faculty of Medicine at The University of British Columbia and the Combined Neurosurgical and Orthopaedic Spine Program at the Vancouver Hospital is seeking an academic spine neurosurgeon. The individual should have advanced training and/or experience in all aspects of spinal surgical care including spine and spinal cord trauma, intradural spinal procedures, and advanced spinal stabilization techniques. Applicants should be committed to working within an active academic multidisciplinary program with clinical, teaching, and research possibilities.

The Spine Program at the Vancouver Hospital is the referral centre for spinal cord injury and complex spine surgical care for the province of British Columbia. In collaboration with The Rick Hansen Institute and discovery scientists, the ICORD (International Collaboration on Repair Discoveries) spinal cord research institute has recently been awarded \$26 million and will provide unique opportunities for clinical, translational, and discovery research for the successful candidate.

The applicant must be eligible for registration with the College of Physicians and Surgeons of British Columbia and certification by the Royal College of Physicians and Surgeons of Canada. Academic rank and remuneration will be commensurate with qualifications and experience. UBC hires on the basis of merit and is committed to employment equity. We encourage all qualified persons to apply, however, Canadians and permanent residents of Canada will be given priority.

Interested candidates should submit their curriculum vitae and the names of three references to:

Gary J. Redekop, MD
Head, Division of Neurosurgery, The University of British Columbia
3rd Floor, 910 West 10th Avenue, Vancouver, British Columbia V5Z 4E3
